

PROVIDING GLOBAL ACCESS TO QUALITY MEDICAL CARE

P | R | O | D | U | C | T | | G | U | I | D | E

Imres can offer solutions for all types of health programmes in the international relief market

Greener choice products	3-5
Pharmaceuticals	6-18
Medical Kits	19-29
Medical Consumables	30-35
Medical Instruments	36-38
Hospital & Doctors Room Equipment	39-43
Diagnostics	44-46
Food Supplements	47-47

All quantities and products are subject to change. Our terms & conditions apply and can be found on our website.

Tel: +31 (0)320 296969 | Email: info@imres.nl | www.imres.nl

GOOD FOR THE PATIENT, GOOD FOR THE ENVIRONMENT

To support you in your sustainable procurement we are constantly looking for greener products as an alternative for existing products in the same product category. Sustainable medical products are those that are designed and produced with minimal environmental impact, while also meeting the needs of patients and healthcare professionals.

These products can include everything from medical instruments and devices to packaging and disposables. It is our firm ambition to grow this list in the years to come, and move to a more sustainable product portfolio.

Simultaneously on procuring sustainable products Imres is also in the process of replacing regular plastics that we use in our packing materials for bioplastics that have less impact on the environment.

A greener choice product in this category is not necessarily 100% green but more sustainable because of the following characteristics:

1. Reusable medical devices: These are devices that can be sterilized and used multiple times, reducing the need for disposable products.
2. Biodegradable materials such as those made from plant-based polymers, can be broken down by natural processes, reducing their environmental impact.
3. Recyclable materials: Consumables made from materials that can be easily recycled, such as paper and plastic, can be processed and re-used.
4. Energy-efficient products: Medical devices that use less energy, such as LED or solar lighting, can lower the carbon footprint of healthcare facilities.
5. Ethically sourced products that are produced by companies that follow fair labor practices and have a good reputation for human rights.
6. Biobased materials: Medical consumables made from natural sources like corn starch, sugarcane and other plants-based materials are considered to be sustainable as they are renewable and biodegradable.

Art. nr.	Unit	Description	Language label
79505	1	height measuring board, infant/child, 0-129 cm, cm-scale, graduation 1 mm, hard wood, collapsible, with 2 carrying straps	EN

WIDE RANGE OF PHARMACEUTICALS

At Imres we have the widest range of generic and branded pharmaceuticals for any health programme in the market. Our range is based on the WHO list of essential medicines, but goes much further than that. Our aim is to supply the right medicines, in the right form, at the right time for your health programme.

We distribute our own Imres range of high quality, affordable generic pharmaceuticals. They are specially developed for the hospital and pharmacy market and distributed worldwide. The "Distributed by Imres" products are labelled in English, French, Spanish and Portuguese. We always keep sufficient stock of this range for immediate dispatch. In addition to this, Imres has an extensive range of other generic and branded pharmaceuticals.

To safeguard the quality of our pharmaceuticals, we continuously have GMP audits conducted by our qualified pharmacists, along with re-analysis and contra-analysis of pharmaceuticals.

ONE-STOP-SHOP

Imres maintains minimum stock levels of pharmaceuticals at all times. These pharmaceuticals are stored in our climate controlled GDP-certified warehouse in the Netherlands, where we monitor the expiration dates to ensure a sufficiently long shelf life upon shipment.

While more than 40 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

A COMPLETE MEDICAL SOLUTION IN A BOX

That is the essence of a medical kit. In this brochure, you will find an overview of our range of medical kits. If you need a solution for which there is no kit available yet, we can customise one for you.

Imres packs and distributes all types of emergency and medical kits, according to our customers' specific requirements. These range from simple to complicated kits, for a variety of purposes, assembled either from stock or specially developed and sourced for customers.

FAST & EFFICIENT

The best medicine is useless if it cannot get to where it is needed, when it is needed. We know that delays can cost lives, so our logistics solutions are designed for speed and efficiency. We hold sufficient stock of the most common medical kits. Our experienced logistics department can get stocked kits to any location in the world within 48 hours of receiving your order.

EXPERT SOURCING & FLEXIBILITY

Do you need a kit solution that is not readily available? Over the years Imres has composed many custom-made medical kits for various needs, in close collaboration with our customers. Our extensive database of quality suppliers and product combinations enables us to cater for every medical supply need that you may have. While more than 40 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

QUALITY

You want to be sure that the products for your health programme are high quality. We do not take any chances when it comes to the quality of the kits and products that we supply.

Imres has implemented an uncompromising set of quality controls, including a dedicated quality control department and independent testing in World Health Organization (WHO) pre-qualified and ISO/IEC 17025:2005 certified laboratories for pharmaceutical products. Our stringent vendor rating system sees Imres visiting and screening vendors around the world. Manufacturers must achieve our high, internationally recognised standards, and those of our customers, and that they adhere to the necessary quality control processes to qualify as an Imres vendor. All our products are screened, to ensure the quality of every item that we supply.

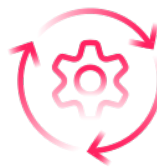

FACTS ABOUT THE IMRES MEDICAL KITS

Over 5 million kits produced

10,000 kits in stock

Sourced from 300 + quality manufacturers

24/7 emergency response

PROVEN SOLUTION

An Interagency Emergency Health Kit (IEHK) contains all the necessary medication and basic medical supplies for a population of 10,000 for three months. In a refugee camp with a population of 50,000, five IEHK kits provide the basic medical solution for the entire population; all conveniently packed in clearly marked boxes.

79374	IEHK 2024, Supplementary: Renewable Unit	EN/ES/FR/PT
79375	IEHK 2024, Supplementary: Equipment Unit	EN/ES/FR/PT

IEHK COMPOSITION

The IEHK 2024 consists of two different sets of medicines and medical devices: a Basic Unit and a Supplementary Unit. Each IEHK is designed to serve 10,000 people for three months.

All units are packed in extra sturdy boxes to ensure its contents are secure. Each box has a maximum weight of 25 kg. We hold sufficient stock of IEHK's to respond quickly to any crisis or emergency situation.

1,000	1,000	1,000	1,000	1,000	} 10 x 1 Basic Unit for 10 x 1,000 people	} Total: 1 emergency health kit for 10,000 people for 3 months
1,000	1,000	1,000	1,000	1,000		
10,000					} 1 Supplementary Unit for 1 x 10,000 people	

BASIC UNIT MODULES

The Basic Unit contains essential medicines and medical devices, and can be used by primary healthcare workers with limited training. It contains oral and topical medicines, and no injectables. To facilitate distribution to smaller health facilities on site, the quantities of pharmaceuticals and medical devices in the basic unit have been divided into 10 identical units, each for 1,000 people.

SUPPLEMENTARY UNIT MODULES

The Supplementary Unit contains additional essential medicines and medical devices, and is to be used only by professional health workers or physicians. There are seven modules in the supplementary unit. One with equipment, one with renewables, and five with medicines. Some of the modules are optional since they may not be needed in all cases.

OPTIONAL MODULES

Anti-malaria modules are available for both the Basic Unit and the Supplementary Unit. The anti-malaria module for the Basic Unit consists of a combination therapy for the treatment of uncomplicated falciparum malaria, as well as malaria rapid tests. The anti-malaria module for the Supplementary Unit consists of second line treatment injectable drugs.

The Supplementary Unit also has an optional post-exposure prophylaxis (PEP) module. It contains medicines and diagnostics for first line treatment after potential exposure to HIV infection.

The other optional modules are the cold chain medicines, the controlled medicines and the documentation module. The optional modules will only be included on specific request.

Emergency Reproductive Health (ERH) Kits have been designed primarily to provide priority reproductive health services to displaced populations without medical facilities, or where medical facilities are disrupted during a crisis. These kits contain essential drugs, supplies and equipment to be used for a limited period and a specific number of people.

ERH KIT COMPOSITION

The Reproductive Health Kits are categorised in three blocks. Each block targets a different health service delivery level. All units are packed in extra sturdy boxes to ensure its contents are secure and each box is equipped with convenient carrying handles on the sides.

BLOCK 1

Contains six kits. The items in these kits are intended for use by service providers delivering reproductive health care at community and primary health care level. Each kit is designed to provide for the needs of 10 000 people for 3 months. The kits contain mainly medicines and disposable items. Kits 1 and 2 are divided into parts A and B, which can be ordered separately.

Art. Nr	Kit No.	Description	Language label	Color code
29596	Kit 0	Administration/training supplies	en-us/es/fr/pt	Orange
29456	Kit 1A	Condoms male	en-us/es/fr/pt	Red
32640	Kit 1B	Condoms female	en-us/es/fr/pt	Red
33078	Kit 2A	Clean delivery, individual	en-us/es/fr/pt	Dark blue
33077	Kit 2B	Clean delivery, for use by birth attendants	en-us/es/fr/pt	Dark blue
29458	Kit 3	Post rape treatment	en-us/es/fr/pt	Pink
30165	Kit 4	Oral and injectable contraception	en-us/es/fr/pt	White
29459	Kit 5	Treatment of sexually transmitted infections	en-us/es/fr/pt	Turquoise

BLOCK 2

Contains five kits with disposable and reusable supplies, for use by trained healthcare providers with additional midwifery and selected obstetric and neonatal skills at the health centre or hospital level. These kits are designed to be used for a population of 30 000 people over a 3-month period. It is possible to order these kits for a population of less than 30 000 persons; this means that the supplies will last longer. Kit 6 has two parts, A and B, which are used together but can be ordered separately.

Art. Nr	Kit No.	Description	Language label	Color code
46126	Kit 6A	Clinical delivery assistance, reusable equipment	en-us/es/fr/pt	Brown
46127	Kit 6B	Clinical delivery assistance, drugs & disposable equipment	en-us/es/fr/pt	Brown
30046	Kit 7	Intrauterine devices (IUDs)	en-us/es/fr/pt	Black
29597	Kit 8	Management of miscarriage and complications of abortion	en-us/es/fr/pt	Yellow

29462	Kit 10	Vacuum extraction delivery	en-us/es/fr/pt	Grey

BLOCK 3

Contains two kits with disposable and reusable supplies to provide comprehensive emergency obstetric and newborn care at the referral (surgical obstetrics) level. It is estimated that a hospital at this level covers a population of approximately 150 000 persons. The supplies provided in these kits would serve this population for 3 months. Kit 11 has two parts, A and B, which are usually used together but which also can be ordered separately.

Art. Nr	Kit No.	Description	Language label	Color code
29463	Kit 11A	Referral level kit for reproductive health, reusable equipment	en-us/es/fr/pt	Fluorescent green

29607	Kit 12	Blood transfusion kit	en-us/es/fr/pt	Dark green

**TRAUMA EMERGENCY SURGERY KIT
COMPOSITION MODULE 1**

The TESK 2019 module 1 is subdivided in three submodules. Each submodule consists of a number of sets. The different sets from the submodules can be ordered individually which allows the customer to select the appropriate combination of individual sets. **Please be aware that some sets require import licenses and/or cold chain capacity!**

SUB-MODULE 1A, CONTAINS SEVEN SETS

Art. Nr	Description	Language label
68503	(TESK 2019 module 1A) SET, DRUGS, BASIC	en-us/es/fr/pt
68504	(TESK 2019 module 1A) SET, DRUGS, CONTROLLED	en-us/es/fr/pt
68505	(TESK 2019 module 1A) SET, DRUGS, ANTIDOTE RESCUE	en-us/es/fr/pt
68506	(TESK 2019 module 1A) SET, DRUGS, COLD CHAIN	en-us/es/fr/pt

SUB-MODULE 1C, CONTAINS FOUR SETS

Art. Nr	Description	Language label
68520	(TESK 2019 module 1C) SET, SUPPLEMENTARY, ANAESTHESIA MATERIAL	en-us/es/fr/pt
68521	(TESK 2019 module 1C) SET, SUPPLEMENTARY, EXTRICATION COLLARS	en-us/es/fr/pt
68522	(TESK 2019 module 1C) SET, SUPPLEMENTARY, SPLINTS, FOR 15-20 FRACTURE CASES	en-us/es/fr/pt
69953	(TESK 2019 MODULE 1C) SUPPLEMENTARY, INTUBATION & LARYNGOSCOPE	en-us/es/fr/pt

NON-COMMUNICABLE DISEASE KIT (NCDK)

Non-communicable diseases are increasingly becoming a primary cause of death worldwide. The healthcare systems in emergency situations or low resource settings are usually not geared to treat these diseases. The WHO has developed a standardised kit that fills the gap between the Interagency Emergency Health Kit and the treatment of NCDs in primary healthcare, the Non-Communicable Disease Kit.

The Non-Communicable Disease Kit is a pre-packed, standardised medical kit for managing the most common non-communicable diseases like diabetes, cardiovascular diseases, chronic lung diseases, hypertension, cancer and selected mental health conditions. The NCDK contains oral medicines, renewables, medical devices and additional products. It serves 10.000 people for three months. The NCDK can be used in both emergency situations as well as in other low resource settings. Due to its modular set-up, it can be ordered as a complete kit, or the sub modules can be ordered independently.

CHOLERA KITS

Cholera kits are designed to help prepare for a potential outbreak and to support the first month of the initial response. Imres's cholera kits are tailor-made and designed according to WHO specifications, to prepare for outbreaks and to meet the needs for the initial response.

Mental Health Kit

The Mental Health Kit 2022 is designed to treat selected mental health and neurological conditions, for outpatient care in primary health care settings and at hospital level. The kit contains two modules which can be ordered separately. Module 1 is for Primary Health Care settings (PHC), Module 2 is at Hospital level. Each module consist of 7 boxes.

Module 1 Medicines for PHC (76846)

Contains essential medicines to manage selected mental health and neurological conditions in non-specialized care and needs to be handled by trained clinicians. It contains essential medicines (oral medication and injectables) to treat selected conditions such as depression, anxiety, epilepsy, schizophrenia, and bipolar disorder. This kit does not include diazepam and naloxone, both medications can be ordered separately.

To use these medicines, it is recommended to be guided by either the mhGAP Humanitarian Intervention Guide or mhGAP Intervention Guide or a similar evidence-based resource suited for the local context. All medicines in the kit are on the WHO Model EML 2023.

Health workers not specialized in psychiatry or neurology require training and supervision by specialists to handle these medicines responsibly.

Module 2 Medicines for Hospital (76436)

Contains 2 additional medicines (beyond the medicines covered in module 1 for PHC): clozapine 100 mg and clozapine 25 mg. Consult with a psychiatrist or available mental health specialists before the use of clozapine among those who have not responded to other antipsychotic medications at adequate doses and durations.

Only use clozapine under the supervision of a psychiatrist or available mental health specialists and only if routine laboratory monitoring of White Blood Cells count is available, due to the risk of life-threatening agranulocytosis

Wash and Dignity Kit

A WASH (Water, Sanitation & Hygiene) and Dignity Kit is essential in the early stages of a crisis when basic infrastructure is unavailable.

The Imres WASH and Dignity Kit contains 14 items with a minimum shelf life of 5 years. It includes an instruction leaflet on how to use the items in the kit. The composition of the kit is in line with international standards and has been proven to be an effective aid for affected communities in disaster stricken areas.

The essence of the kit is to ensure the storage of clean water and to help families maintain good hygiene practices in difficult circumstances where basic sanitation is not available and people are exposed to life-threatening diseases such as cholera and diarrhoea. In addition to sanitation and hygiene products, the kit includes a whistle and torch for personal safety in dark or unfamiliar environments.

The kit is designed for a family of 5, two adults and three children. Imres can supply the kit in two versions:

- One household kit, for easy and quick distribution to individual households
- Five Household Kit, for efficient transport to areas where there is a high need for WASH and Dignity Kits.

SURGICAL INSTRUMENT KITS

The Surgical Instruments Kits offered by Imres are complete solutions for specific surgical procedures. They are carefully composed in close collaboration with our customers, and consist of the highest quality instruments. Please contact us if you need a surgical kit solution that is not on this list as we can compose a custom kit solution for your specific need.

OUR RANGE OF MEDICAL CONSUMABLES

High quality medical consumables in sufficient numbers are a crucial factor in the success of your health projects. From plasters and bandages to syringes and infusion sets, Imres has a large and diverse range of high quality medical consumables in stock, ready to be delivered.

We distribute our own Imres range of high quality, affordable, medical consumables, bandages, dressings and sutures. We keep sufficient stock of this range for immediate dispatch. The "Distributed by Imres" products are labelled in English, French, Spanish and Portuguese.

ONE-STOP-SHOP

Imres maintains sufficient stock levels of medical consumables at all times. They are stored in our climate controlled, GDP certified warehouse in the Netherlands, where we monitor the expiration dates to ensure a sufficiently long shelf life upon shipment. Our medical consumables are available for immediate shipment.

While more than 40 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

OUR RANGE OF MEDICAL INSTRUMENTS

When working in the field, you need high quality medical instruments that will ensure an effective treatment, but you also require an economically viable solution for your health project. At Imres we have successfully combined quality and affordability in our wide range of superior medical instruments.

Every medical instrument offered by Imres is made from high grade surgical stainless steel, to ensure quality and longevity. From forceps to scissors, and from trays to sterilisers, we have everything in stock for immediate dispatch.

ONE-STOP-SHOP

Imres maintains sufficient stock levels of medical instruments at all times. These instruments are stored in our climate controlled, GDP certified warehouse in the Netherlands and can be shipped immediately.

While more than 40 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

59218	1	wheelchair, adult, epoxycoated steel, 24" solidspoke wheel, PU tires, 8" castors, flip-back arm/swing-away legrest	EN

DIAGNOSTICS

To prevent diseases from spreading, it is critical to be equipped to perform a quick and thorough diagnosis in the potentially affected population. Imres offers a wide range of diagnostics ranging from urine test strips for glucose to various blood tests for malaria, HIV and hepatitis B.

ONE-STOP-SHOP

Imres maintains sufficient stock levels of diagnostics at all times. They are stored in our climate controlled, GDP certified warehouse in the Netherlands, where we monitor the expiration dates to ensure a sufficiently long shelf life upon shipment. Our diagnostics are available for immediate shipment.

While more than 40 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

THE IMRES DIFFERENCE

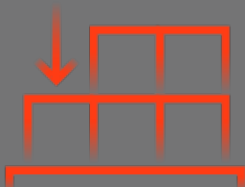

+ Over more than **40 years**, Imres has proved that we are a reliable, efficient and trusted partner in **healthcare strengthening programmes** in developing countries.

+ As an organisation, we are big enough to **make a difference**, but small enough to give our customers personal attention, and to care about the difference that we are making in lives and communities, and in our partners' health projects.

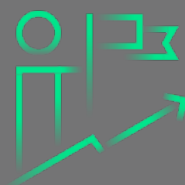

+ We have **offices and facilities** in the **Netherlands, Dubai, India, and China.**

+ Our **production areas** contain 2500 m² kit production area's in the Netherlands and Dubai. As a supplier, we do not make **promises** that we cannot keep. If we commit to a project and specific deliverables, it is because we really can deliver, as **promised.**

+ Like the projects that we are **proud** to be part of, Imres has heart. We are good at what we do, but we also feel good about what we do. We feel responsible for our partners' projects until each one ends **successfully.**

+ Then we move onto our next challenge; our next opportunity to turn humanitarian dreams into **concrete solutions** and **decisive action** that saves lives.
